EXPLANATORY—SCHEDULE B

Purpose. The purpose of this schedule is to obtain—for each study carrier and by totals for all study carriers—(1) total operating revenue, (2) revenues attributable to the various types of traffic at issue, (3) revenue attributable to the total non-issue traffic, and (4) miscellaneous station and other operating revenues. These data shall be provided for the specified study periods, namely: Base year actual, pro forma year based on current revenues, and pro forma year based on proposed revenues.

The pro forma year based on proposed revenues for the traffic at issue will be compared to the issue traffic revenues for the pro forma year based on current revenues and for the base year actual to determine the amount of the proposed revenue increase being sought over these two periods. In addition, the revenue data for the total issue traffic (column (d)), will be used in Schedule C, Part III as a basis for allocating increased costs, i.e., the increased operating expenses and the increased “sum of money” costs.

Base Year Actual. Data to be reported in this and other schedules herein for the base year actual shall be based on the 4-quarter calendar year periods identified below:

FILING MONTH OF VERIFIED STATEMENT

January	Sept. 30, preceding year.
February	Do.
March	Do.
April	Dec. 31, preceding year.
May	Do.
June	Do.
July	Mar. 31, filing-month year.
August	Do.
September	Do.
October	June 30, filing-month year.
November	Do.
December	June 30, filing-month year.

The 4-quarter calendar year periods identified above represent the minimum require-

ment. However, in event a proposed fare/charge increase is filed at a time when data for a more current quarter than that specified are obtainable then that more current quarter may be used in the base year actual. For example, if an increase is filed in late March and data for the 4th quarter of the preceding year are obtainable, then the base year actual ending December 31 may be used in lieu of the base year actual ending September 30.

Pro forma year data. Revenue data for the pro forma year shall be reported in two ways, namely: Based on current revenues and based on proposed revenues. Separate schedules are required for each pro forma year. These data do not represent a forecast but reflect the results of 12 months of operation at particular rate levels. Thus, data for the pro forma year based on current revenues should be based on a restatement of the revenue data for the base year actual to reflect fares and/or charges which are currently in effect. Similarly data for the pro forma year based on proposed revenues should reflect a restatement of the base year actual data but at levels reflecting the proposed fares and/or charges.

Column (a). Insert in this column the company name of each “study carrier” as defined in §1139.21 of the prescribed procedures.

Column (b). Use carrier’s Annual Report, Schedule 2998, Line 9. The dollar amount in this column, for each study carrier, should equal the total of columns (d), (e), and (f).

Columns (c-1), (c-2), etc. As defined in §1139.21, “issue traffic” means that traffic (service) affected by the proposed increase in fares and/or charges, and is limited to the fares and/or charges published in schedules and tariffs filed with the Surface Transportation Board. For the purpose of the proposed increases filed under the prescribed procedures of this proceeding, column (c)

should be subdivided into columns (c-1), (c-2), etc. to show separately the revenue for each type of traffic in issue and each column should be appropriately headed. For instance, a proposal to increase passenger fares and express rates would call for Intercity Passenger Revenue in column (c-1), and Express Revenue in column (c-2). If a third basic service is included in the proposed increase, column (c-3) should show revenue from that traffic with an appropriate identification in this column heading.

Column (d). The total issue traffic revenues in this column should equal the sum of columns (c-1), (c-2), etc.

Column (e). The revenues to be reported in this column shall consist of those revenues other than “total issue traffic revenue” (Column (d)), and “miscellaneous station and other operating revenues” (Column (f)). Thus, “non-issue traffic revenue” means those revenues accruing from providing the types of services indicated in columns (c-1), etc., but which may be “intrastate” in nature, are “exempt” as provided under 49 U.S.C. 10721, 10722, 10723 and 10724, or which are otherwise not at issue in a proposed fare and/or charge increase. Such non-issue traffic may also include a commuter or mass transportation service, which is the transportation of passengers generally performed within a city or town and the suburban areas contiguous thereto. However, in some instances this service may also be intercity in

character where the cities involved are within relatively short distances of each other and the primary purpose is the mass transportation of commuter passengers to and from these cities.

Column (f). For the purpose of this schedule the revenues to be reported in this column shall consist of those in Account 3600, Miscellaneous Station Revenue, and in Account 3900, Other Operating Revenue. (See 49 CFR Part 1206.)

Presentation of statement on revenue sample studies. Historically, in order to separate interstate from intrastate revenues, it has not been necessary for annual report purposes for each carrier to conduct studies of its traffic operations, whether based upon sampling or otherwise, however, many of the Class I carriers make such studies for managerial purposes. In order to permit the evaluation of such studies, and the evidence derived therefrom, each study carrier, as defined in section 1139.21, shall submit an affidavit explaining how its study was conducted and how it appraises the reliability of the results. Carriers having studies based upon sampling should conform with the staff report entitled “Guidelines for the Presentation of the Results of Sample Studies,” February 1, 1971.

[42 FR 32541, June 27, 1977. Redesignated and amended at 47 FR 49577, Nov. 1, 1982; 64 FR 53268, Oct. 1, 1999]
